

FROM THE EDITOR'S DESK

This has been a month of plentiful activity—competitions of every kind held by different schools, Bagless Day activities, mid-term academic reviews, the school's first ever commerce festival - Vanijyam being conducted on the premises, class assemblies...children have multitasked and stretched and been an active part of all that is possible. Catch glimpses here...

-Shanthi Menon
Founder Principal

Theme of the Month- Aaranya

We move houses every 7 to 10 years. In the wild, animals shift homes several times a day—a tree to rest, a stream to drink, a clearing to hunt. For them, the forest isn't just a place. It's everything. We grab groceries wrapped in plastic. In many tribal regions, people gather dinner straight from the forest—roots, fruits, leaves, honey. It's not convenience food, it's survival. We scroll for skincare. Forests provide oils, herbs, and resins that communities have used for generations—long before brand names and price tags. While we build lives with concrete and code, millions still build theirs around forests. Forests offer not just food and nutrition, but income, medicine, shelter, and identity. In Sanskrit, "aranya" means forest or wilderness—a word that feels ancient, but whose relevance is more urgent than ever. Because even today, forests are key to food security, nutrition, and livelihoods. And yet, they're disappearing. Saving forests isn't just about trees—it's about protecting the roots of life itself.

Forests provide food in ways we often overlook. In many tribal and forest-dwelling communities, wild plants like mushrooms, leafy greens, and fruits are part of everyday meals. These aren't backup options—they're essentials, especially during crop shortages or droughts. Forest foods are free, accessible, and often available when farm-grown food isn't. They help fill the gap during what's called the "lean season," when stored grains run out and the next harvest hasn't yet arrived. Many forest foods are naturally packed with nutrients. Leaves like moringa, fruits like jamun and amla, or seeds like tamarind offer vitamins and minerals that help prevent common health issues like anemia or vitamin deficiencies. In areas where access to healthcare is limited, these foods quietly do the work of expensive supplements. Traditional knowledge about which plants heal and which nourish is passed down through generations—and it works.

When forests are cleared for roads, farms, or mining, it's not just trees that are lost. The systems that provide food, nutrients, and jobs begin to fall apart. Deforestation affects the rainfall that farmers rely on. It reduces access to wild foods. It pushes out people who've depended on forests for centuries. Slowly, food security weakens. So does nutrition. So do rural economies. Forests have always done the work—feeding people, healing bodies, supporting lives—without asking for credit. They don't come with ads, slogans, or a marketing team. But maybe it's time we paid more attention. Because protecting forests isn't just about saving animals or hugging trees (though, no shame if you do). It's about keeping food on plates, nutrients in diets, and incomes flowing for millions. If we treat forests as allies instead of afterthoughts, they'll continue doing what they've always done—quietly, steadily, and without a fuss. And in a world that's only getting louder, that kind of quiet strength might be exactly what we need.

- Anwita Tripathy 7D

Grade 1 – Grandparents Day

Grandparents Day...a time to honour another key member of a child's family. While parents have a profound effect on a child's upbringing, grandparents offer something uniquely special, a glimpse into a world beyond technology, filled with timeless values, undivided attention, and unconditional love. Deens Academy, Whitefield made it special for Grade 1 grandparents on 25th July.

Grandparents arrived in complete enthusiasm and anxiety as to what is lying ahead for them. Children opened the show with a melodious, heart touching song along with a delightful dance performance. It was overwhelming to see how the children bonded with their grandparents while they got busy with an activity, "Hand in Hand with Grandparents."

Children and their grandparents traced each other's hands and decorated them together to create an art piece as a memory for life. Grandparents showcased their own talent in singing, storytelling, and recounting cherished moments from their lives, adding a personal and emotional touch to the celebration. Well, eventually, all good things come to an end. This event brought in a realisation that young children need a cultural connection in this modern world!

Spell Bee Competition

Words flew, minds raced, and the buzz was electric at this year's Spell Bee Competition. After an intense showdown of syllables and smarts, we're proud to announce the spelling wizards who outshone the rest and claimed their spot at the top:

Grade 1 - event held on 11th July, 2025

First Place: Darsh Routray - 1A
Second Place: Vaidehi Singh - 1B
Third Place: Jinia Kar - 1C

Grade 2 - event held on 7th July, 2025

First Place: Preesha Bandyopadhyay - 2B
Second Place: Akshit Kumar Singh - 2C
Third Place: Madhav V K - 2C

Grade 3 - event held on 4th July, 2025

First Place: Ritam Muguli - 3B
Second Place: Viaan Gupta - 3A
Third Place: Kireeti Uppaluri - 3D

Grade 4 - event held on 2nd July, 2025

First Place: Ayaansh Jain - 4D
Second Place: Prashansa Mohanty - 4A
Third Place: Atharva Sahoo - 4C and Sachit Mishra - 4D

Grade 5 - event held on 2nd July, 2025

First Place: Srithik Trishul - 5B
Second Place: Arjun Adepu - 5D

This competition wasn't just about spelling—it showcased poise, quick thinking, and a genuine love for language. Every participant showed remarkable talent, making this year's Spell Bee a memorable one. A huge round of applause to all our participants who made this event a success! Let's keep the wordplay going and continue celebrating the magic of learning.

Dad and Me No Limits to a Dad's Love

On **23rd July**, our second graders and their amazing dads created unforgettable memories together! With paintbrushes in hand and smiles on their faces, dads lovingly designed colorful t-shirts for their little ones — each one as unique as their bond.

Just when the dads thought the surprises were over, the children took the stage and delighted them with a special dance performance, filling the place with joy, laughter, and a few happy tears. It was a day filled with creativity, connection, and love — a reminder that when it comes to a father's love, there truly are no limits.

It was a cold day on the morning of the trek for grade 8 at the Gudibande fort, off the Bangalore-Hyderabad highway. Everyone woke up ecstatic to see how the day would go by, coming onto the campus extremely tired but excited. The day started by everyone enthusiastically fighting for the seats in the buses and shifting of buses. Afterwards we made our journey to the outskirts of the Isha ashram to eat a filling breakfast where friendly bets were made as to who could reach the peak of the mountain first. We made our way to the starting point of the trek where the groups were made and the briefing was given.

This trek really tested our stamina and physical strength as the Gudibande fort has more than a thousand steps. Once 10 percent of the trek finished, we were out of breath and almost started to give up but the stunning views and the curiosity of what we would see at the top kept us going. We weren't disappointed by what we experienced at the top, stunning greenery and a whole village below greeted us at the summit. After a quick photo session and a session about the history of the mountain we began our descent.

The day ended with a trip to the Isha ashram which was an ethereal experience. Once we were back to the campus no one wanted to leave! In fact, we wanted to do it all over again! What an amazing way to spend our Saturday!

-Sharanya, 8B

Art integration activity to study the malleability and ductility of metals grade 8A

Malleability and ductility, properties of metals, play a significant role in both chemistry and art. Malleability refers to a metal's ability to be hammered or pressed into thin sheets, while ductility is its capacity to be drawn into wires.

Creative Applications:

The ability to bend, hammer, and shape metals allows students to express their creativity and create unique pieces.

Procedure:

Students could be tasked with designing and crafting an object using materials that demonstrate these properties, like aluminum foil (malleable) or copper wire (ductile).

8D and 8E:

Debate Competition

Deens Academy recently hosted an exciting Inter-House Debate Competition for Grades 6 to 8. To qualify, each house held its own selection round to choose the best speakers. The finalists then faced off in the main event, where they debated some truly interesting and challenging topics like:

- Is AI a career maker or job stealer?
- Is public surveillance a privacy concern?
- Is cosmetic animal testing ethical?

The participants spoke with confidence and passion, making strong arguments and precise rebuttals. It was great to see how well-prepared and thoughtful everyone was. All the houses put up a great fight, the competition was tough, but also fun and full of learning.

Interhouse DEBATE winners:

Grade6

- 1st - Vihaan Bhargava, 6B from Flavus
- 2nd - Shayaan Wakee, 6B from Prasinus

Grade7

- 1st - Vivikta Mohapatra, 7E from Prasinus
- 2nd - Aaradhya kalshetty, 7C from Flavus

Grade8

- 1st - Chidanand Venky Prem, 8B from Prasinus
- 2nd - Samarth Praveen, 8A from Caeruleus

- Samarth Praveen, 8A

Grade 8 Trek

Grade 4 – Bagless day – July 18th

Bagless Day- Well, what does it mean?

A literal translation of Bagless Day would mean that students get a break from carrying their backpacks to school. Well, the actual interpretation- it is actually a CBSE initiative to provide a day filled with excitement, fun, and learning that goes beyond the regular curriculum. Students look forward to this day, as it unfolds enriching experiences that kindle new interests in various subjects through these engaging activities. Grade 4 held their first Bagless Day on July 18th, and the students were filled with excitement as they awaited their teachers' plans for the day. Let's hear from our students about their experiences on this successful Bagless Day!

Science – Hologram Magic: A Bagless Day Surprise!

On Bagless day, students of Grade 4 explored the fascinating world of holograms through a fun hands-on science activity. Using simple materials like transparent sheets, cardboard box and a mobile screen, we created a 3D hologram projector that brought images to life! The highlight of the activity was watching animated figures float in mid-air. It was a magical experience. Everyone was thrilled to see science and creativity come together. Through this activity we learned about light reflection, angles and optical illusions. It was truly a day of joyful learning and discovery!

-Sanvi Sandrajith- Class 4A

Math-Magic in every square!

As part of our Bagless Day Activity, our math teacher, Aishwarya Ma'am, showed us the amazing world of Magic Squares- a fun and exciting math puzzle that the great mathematician Srinivasa Ramanujan loved! We learned about Ramanujan's special 4x4 magic square. It is a grid with four rows and four columns, and the coolest part is that all the rows, columns, and even the diagonals add up to the same number. It felt like solving a number mystery! The best part was that we got to make our own magic squares! Some of us even decorated our squares with bright colours and fun designs to make them look magical.

We had so much fun finding patterns and solving the puzzle. Our faces beamed with joy when we made numbers match. Ramanujan's love for numbers showed us that math can be magical too! It was a wonderful day filled with learning, laughter and number magic- a day never to forget.

- Navaneetha Kurichiyath- Class 4C

Art-Splashing colors on Bagless Day!

My First Bagless Day of grade 4. This year, on 18th July, we had our first Bagless Day at school—and it was amazing! Even though it's called "Bagless Day," it doesn't really mean we come without bags. It's more like a "bookless" day. We did lots of fun things instead! We did art activity too. We had to make a painting inspired by famous artist named Jamini Roy. I drew a quirky bird with a tail in a weird place, and there were some fish swimming under it too! While painting it, I felt like a mini Picasso. I had fun splashing colors on paper—even though my painting didn't look exactly like the real one. I really liked drawing the quirky bird. I also learned that art is not just about being perfect—it's also about having fun and feeling happy! I hope we have more days like this! ----

- Ayaansh Jain- Class 4D

Hindi-Grammar fun - Exploring, experimenting and growing without any limits!

Bagless day – A day where learning takes a creative turn beyond academics. The day began with a Hindi activity, in which we formed teams of six members each. We had to draw a beautiful tree and write Sarvanaam (pronouns) words on fruits of the tree. This activity combines artistic expression with language learnings leaving us with sweet memories and valuable lessons. A wonderful experience to remember.

- Sanaya Saiyan- Class 4D

English – Word land Explorers-Let the Fun Begin!

Bagless Day on July 18th turned into one of the most awesome school days! We had an English board game activity, and I teamed up with my buddy to create our own super-duper fun game full of world puzzles, grammar traps, and surprise moves! We designed the board, made up exciting rules, and laughed a lot while testing the game. The best part- We cheered as our friends rolled the dice. I learned how amazing teamwork can be, how to turn ideas into action, and English can be total blast when we play with it. Who knew learning could also feel like a party!

- Krithik Das Thakur –Class 4E

SST- State and capital spinner activity

We had to partner with a peer for this activity. Everyone felt excited and overjoyed as they spun the wheel. We laughed, helped each other, and had lots of fun while doing this activity, which combined fun and learning. I really liked the matching of capitals and cities. It was colourful and enjoyable for all. I want to extend my thanks to the teachers for this fantastic activity.

- Syeda Huriya Fathima- Class 4B

Kaddaya Kannada – Words that twisted our tongues and ticked our brains!!!!

We had an exciting KK activity where we explored funny riddles and tongue-twisting phrases. Our teacher Bhagya Ma'am read out some really clever and puzzling riddles, and we enjoyed guessing the answers together. Then, we practiced super tricky and hilarious tongue twisters aloud. Some of them were so hard that we burst into laughter trying to get them right! The most enjoyable and memorable moments were hearing everyone's funny attempts. I learned how to think quickly, speak clearly, and enjoy fun-filled learning with friends. It was truly an unforgettable experience. I would like to thank Bhagya ma'am for organizing this wonderful activity.

- Vihaan. R. Hosurkar – Class 4B

Library- Library giggles with Pictionary Scribbles!

On Bagless Day, we played a super fun game called Pictionary in our Library class. We were divided into teams of 6. Each team chose a leader who was good at drawing. The leader got a secret card with a picture and had to draw it on the board. The rest of team members had to guess. The best part was the guessing element. We learned how to work in a team and think fast. The winning team received two books which was very encouraging. Thank you, Shalini ma'am for organizing this fantastic activity.

- Anika Mukhija- Class 4A

Kannada – Bags off! Brain on!

Sudha Ma'am conducted an awesome Kannada riddle activity. I was able to answer most of the riddles as I solved them while playing with my grandmother for fun. I answered them like riddle-ninja! Then came a tricky one that made me rack my brains.

ನಾನು ದುಂಡಗಿದ್ದೇನೆ ಆದರೆ ಚಕ್ರವಲ್ಲ. ನನ್ನ ಬಳಿ ಅಕ್ಷರಗಳಿವೆ ಆದರೆ ನಾನು ಪುಸ್ತಕವಲ್ಲ - ನಾನು ಯಾರು?

Can you guess the answer?

Everyone laughed, tried to guess and also argued playfully. We did not miss our books, because who needs bags when our brain gets a workout like this!

- Toshik Ganagoor- Class 4C

Computer Science -A Happy Friday

We had a quiz activity during the Computer Science period. She gave us clear instructions on how to open the quiz file and soon, all of us were focused on our screens. The quiz was made using PowerPoint, and it was all about Computer Science. The questions tested our basic knowledge in a fun way. Some of the questions were – "Who invented the computer?", "What does WWW stand for?". There were also questions on different types of software, hardware parts, and even some related to the Internet. It felt like GK quiz but focused entirely on technology. The atmosphere in the lab was lively. It was a great combination of fun and learning. Overall, the Bagless Day was a memorable and enjoyable experience. I hope we have more days like this.

- Anay Joshi – Class 4A

Sugar Charts

Sugar can be harmful to our body if intake is increased it causes diabetes and heart diseases. Sugar is the main type of carbohydrates, crucial for providing energy to the body cells. Women should take no more than 6 teaspoons (25 grams or 100 calories), 9 teaspoons (36 grams or 150 calories) for men and for children, sugar intake is less than 25 grams (6 teaspoons) above the age of 2. Sugar Charts are an awesome way to prevent you from eating too much sugar. Sugar charts were added by Central Board of Secondary Education (CBSE) on May 17th 2025 to compulsorily install it by July 15th 2025. They should include:-

- Recommend daily sugar intake
- Sugar content in common food
- Health risks associated with high sugar consumption
- Healthier dietary alternative

Classes who have done sugar charts also have nice borders, main reasons, pictures, creativity and colourfulness. It was good for the CBSE Board to add the sugar charts to every school as it helps spread the awareness of how much damage sugar can do to our body. There are 2 main types of sugars - Good Sugar and Bad Sugar. Good sugar can be found in unprocessed foods like fruits, vegetables, dairy products and jaggery. Bad sugar is added to foods and drinks during process, preparation, or before consumption. Bad sugar is in sweets like chocolate, candy canes etc. Did you know - Packaged juice consists of 20 -26 grams of sugar per 240 ml and Honey has 17 -18 grams of sugar per 21 grams.

-Aradhay Jaiswal & Kanav Kamboj 5D

Commerce Fest 2025: Where Ideas Cashed In and Creativity Compounded

On 30th July 2025, the Senior Secondary School of The Deens Academy, with unwavering support from its faculty, hosted the much-anticipated VANIJYAM-Commerce Fest 2025. Inspired by the Sanskrit word Vanijyam, meaning trade or commerce, the fest was a vibrant confluence of intellect, innovation, and enterprise — where the currency was creativity and the returns, unforgettable. The event opened on a high note with an elegant inaugural ceremony, graced by the esteemed Principal, Mrs. Shanthi Menon, whose insightful address set the tone for the day. Her words—rich in vision and value—emphasized commerce as the cornerstone of future leadership, adaptability, and global awareness.

From **Shark Tank** to Stock Market Simulations, the events were a diversified portfolio of challenges, each designed to test the market mettle of the participants. Budding entrepreneurs made their pitch-perfect debuts in Shark Tank, floating bold ideas and reeling in applause. Meanwhile, the Stock Market Simulation had participants riding the bulls and dodging bears, proving their mettle in high-pressure trading scenarios.

Marketing & PR saw students cashing in on creativity, crafting slogans and brand strategies that could rival Madison Avenue. The game of persuasion was on full display, where packaging and pitch went hand-in-hand.

In **Monopoly**, the stakes were real—even if the currency wasn't. This life-sized boardroom drama was a crash course in risk-taking, resource management, and economic diplomacy. The new entrant to the fest, **Moot Court**, raised the bar. Future legal eagles argued commercial conflicts with the poise of seasoned litigators. It was order in the court—and chaos in the competition. Then came the **Cricket Auction**, where fantasy cricket met fiscal reality. Participants built their dream teams on a tight budget, balancing passion with precision in a high-octane bidding war. The **Treasure Hunt** wrapped up the day, leaving no stone—or clue—turned. This scavenger sprint was laced with financial riddles that tested both brainpower and teamwork under time pressure.

And when the dust settled, one name echoed louder than others: **Christ Junior College**. Their stellar performance across events showed not just financial fitness, but flawless synergy and sportsmanship. As they claimed the Rolling Trophy, the audience applauded not just victory, but the values it stood for—teamwork, strategy, and sheer determination. Behind the scenes, Deens' own student body worked like clockwork—juggling academics with event logistics, proving they could balance their books and budgets alike. Their resilience and entrepreneurial spirit were the true capital that fueled the fest's success. VANIJYAM- 2025 wasn't just a celebration of skill—it was a masterclass in how Deens Academy nurtures the enterprising minds of tomorrow: investing in hard work, collaboration, and a bullish attitude toward learning, all while ensuring that the joy in the journey is never written off.

Commerce Fest- Another Perspective COMMERCE FEST – A DAY FILLED WITH MEMORIES

The day was July 30th, and The Deens Academy was flooded with many students from different schools, all eager to see what Commerce Fest had in store for them. This was a fest based on various aspects of commerce, including trade, the stock market, and many others. The students of The Deens Academy made this fest more fun than ever and kept everyone entertained and happy. The fest began with the opening ceremony, which consisted of a heartfelt message from our dear principal, Shanti Ma'am. It also featured a gorgeous, eye-catching invocation dance. The students of Deens stated that it was very well choreographed and truly the perfect start to the event. "The decorations were spectacular, and the dance at the opening ceremony was very inviting!" says Anvita Godani of Class 11A. Being a volunteer, she made sure both she and others had fun.

The attendees were all very excited to begin their competitions, one of which focused on trade routes, including many problems and ways to solve them. Yashvi Kariwala, a student from Class 12D and one of the only student judges for this fest, truly enjoyed her experience. She explained, "Being one of the youngest judges there, I was intimidated but also proud of myself." Considering she was the same age as most participants, Yashvi offered a unique perspective to the judging panel. When interviewed, she expressed that one of the best parts of the fest was the school spirit shown by the attendees. "The cheering of the students during the event was truly the highlight of this fest." She also stated that even though she was young, she was treated the same as the other judges and felt seen and heard.

As the day came to an end, everyone sat down together after a day of fun and watched as the closing ceremony commenced. The winning school of the fest was awarded the rolling trophy. This school, Christ Junior College, was filled with innovative and creative students who truly earned their way onto the stage. This event ran smoothly, and for this, we should thank Sridevi Ma'am and Jisha Ma'am, the teachers in charge of this amazing event. We should also thank Stthir Gupta, the student in charge of creating and planning the fest, and Ashna Panigrahy, our head of logistics, who made sure the event was enjoyable for everyone. We should also thank our wonderful volunteers who helped make this event one to remember; without them, this event would not have happened.

Despite certain logistical challenges, the event still ran smoothly. We aim for wider participation all across Bangalore next year. Overall, everyone enjoyed this joyful event and is on the edge of their seats, waiting for the next edition.

- Naomi Moby, 7C

Sports Arena

SPORTS ROUNDUP – JULY EDITION

The Deens Academy

July was a thrilling month for sports enthusiasts at The Deens Academy, marked by both spirited inter-house competitions and impressive performances at inter-school tournaments. The energy on the fields and courts was electric as students displayed exceptional skill, teamwork, and sportsmanship.

Inter-House Competitions

This month saw intense inter-house matches in football and basketball for both boys and girls. The school grounds came alive with cheers and competitive zeal as houses battled it out for top honors.

Football (Boys & Girls, Grade 6-8):

The inter-house football tournament witnessed high-energy matches where strategy and stamina were on full display. The girls' teams showcased commendable teamwork and tenacity, while the boys' matches were fast-paced and fiercely competitive. Congratulations to the **Flavus House (Girls)** and **Rubrus House (Boys)** for clinching the championship titles in their respective categories.

Basketball (Boys & Girls, Grade 6-8):

On the basketball courts, players demonstrated sharp coordination and strong defense strategies. The girls' finals were particularly gripping, with **Prasinus House** narrowly defeating their opponents in a nail-biting finish. In the boys' category, **Prasinus House** emerged victorious after a series of well-fought matches.

Inter-School Competitions

The Deens Academy also made its mark at various inter-school sports events held across the city in July. Our students showcased not only their athletic excellence but also their sportsmanship and discipline.

- The **Deens Boys' Football Team** advanced through multiple rounds, ultimately taking **first place** at the Inter-School Football Meet hosted by various schools.
- In the **Girls' Senior Basketball Tournament** at DPS, our team played brilliantly, securing the **runner-up** position after a closely contested final.
- The **Boys' Senior Basketball Team** continued its winning streak, bringing home the **championship trophy** from DPS.

We are proud of our athletes for their dedication, resilience, and team spirit. Their achievements have set a high standard and continue to inspire the entire student community. We look forward to more victories and memorable sporting moments in the months to come.

- Vasisht A.S. (7C)

An emphatic win for Prasinus in the Intra- school basketball match

Prasinus emerged victorious in an exciting intra-school basketball match against Flavus, showcasing excellent teamwork, determination, and coordination. The atmosphere at our school basketball court was thick with tension — it could almost be cut with a knife. As the players warmed up, students streamed in, eager to grab the best seats.

Meanwhile, the coaches of both teams huddled with their players, finalizing strategies for the big game. The toss was won by Flavus and then the players were off, racing up and down the court in a single-minded pursuit of the ball. The first quarter witnessed a few daring throws coupled with a good number of fouls. Both teams were awarded plenty of free-throws, but squandered their opportunities. The second quarter began with Flavus leading by a few points. The game became much faster and more intense.

The crowd egged on their respective teams, cheering their approval vociferously whenever either team scored. The match continued in the same thread for a long time, until the decisive moment arrived, which tipped the scales in Prasinus' favour. In the third quarter, a rough foul by a Flavus player gave Prasinus two free throws.

Their captain stepped up calmly and scored both with ease. Energized by the crowd's loud cheers, Prasinus took control, moving past Flavus defenders effortlessly and widening their lead. Though Flavus made a late attempt to catch up, it was too late by then. Prasinus sealed a well-deserved victory with a final score of 21–13.

Excited green supporters rushed to the court in celebration. Overall, the final was a true showcase of sportsmanship and a never-say-die spirit.
